

Taking MBCP Work to the Next Level:

What tailoring group-based programs to each participant and their family might mean in practice

Date: Wednesday 18th October

Time: 8:30am (for a 9am start) to 4:30pm

Venue: South of Perth Yacht Club (Wardroom)

Cost: \$100 (non-network members); \$50 (MBCP network members)

Trainer: Rodney Vlais

This workshop will focus on practice issues to assist service providers to tailor group-based men's behaviour change programs to individual participants.

MBCPs have been criticised for adopting a 'one size fits all' approach to every participant. While much of this criticism is unfair, particularly when the available resources have not enabled differentiated responses, this workshop will explore the potential to strengthen the quality of programs through elements of case planning.

Key areas covered within the workshop will include:

- The application of Risk Need Responsivity framework principles;
- Strategies to identify and address dynamic risk;
- The development and use of safety and accountability plans;
- What case planning and case management means in MBCP work.
